

## PROJECT ANALYSIS

Our expertise enables us to readily screen your future project, and make a realistic evaluation of the prospects of successfully obtaining finance, and of developing into a profitable project.

Armed with this analysis, we can work as a team with you to decide the viability of any future funding applications.

We can also identify any gaps that need to be filled, make a detailed projection of the requirements to obtain funding, and importantly ensure that the amount of funding required is realistic and sufficient to ensure a successful project.

In the process, we will alert you to potential business, financial and legal risks, ensure that you remain protected within a solid business structure, and give realistic timetables for completion of funding procedures.

All the above are aimed at giving your project the best chance of obtaining the investment required and on the best terms possible.
